

ARLISS 2010

The University of Electro-
Communications
Takadama Lab.

Our rover “Touch”

- Run Back Type
- Two Navigation Systems

**PDA-based
Navigation System**

**MCU-based
Navigation System**

Contracting Wheel

- Implementing large wheel for clearance
 - The rover's diameter has to be 14cm
 - The function to contract the wheel

Measurement of Ruts

- New flame for Keeping clearance up

Results

	PDA based Navigation System	MCU based Navigation System
1 st launch	Free falling	Distance:3.01km Control Log:○
2 nd launch	Free falling	Distance:3.84km Control Log:×

1st Launch (MCU-Based Rover)

- the rover landed and at 3.01km from the goal points and started Navigation
- However, the rover stacked by its' parachute

Extra Experiment

**Thank you for
all ARLISS staffs and Aero-pack members!!**
