# CanSat Mission

Our CanSat Missions are...

To take panorama pictures in the sky.

We use seven cameras. Six cameras see around CanSat. And one camera see ground.

To come back to the target.

We use parafoil to cameback.

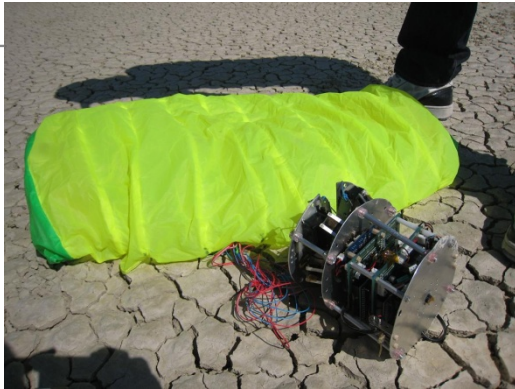

# Mission Result

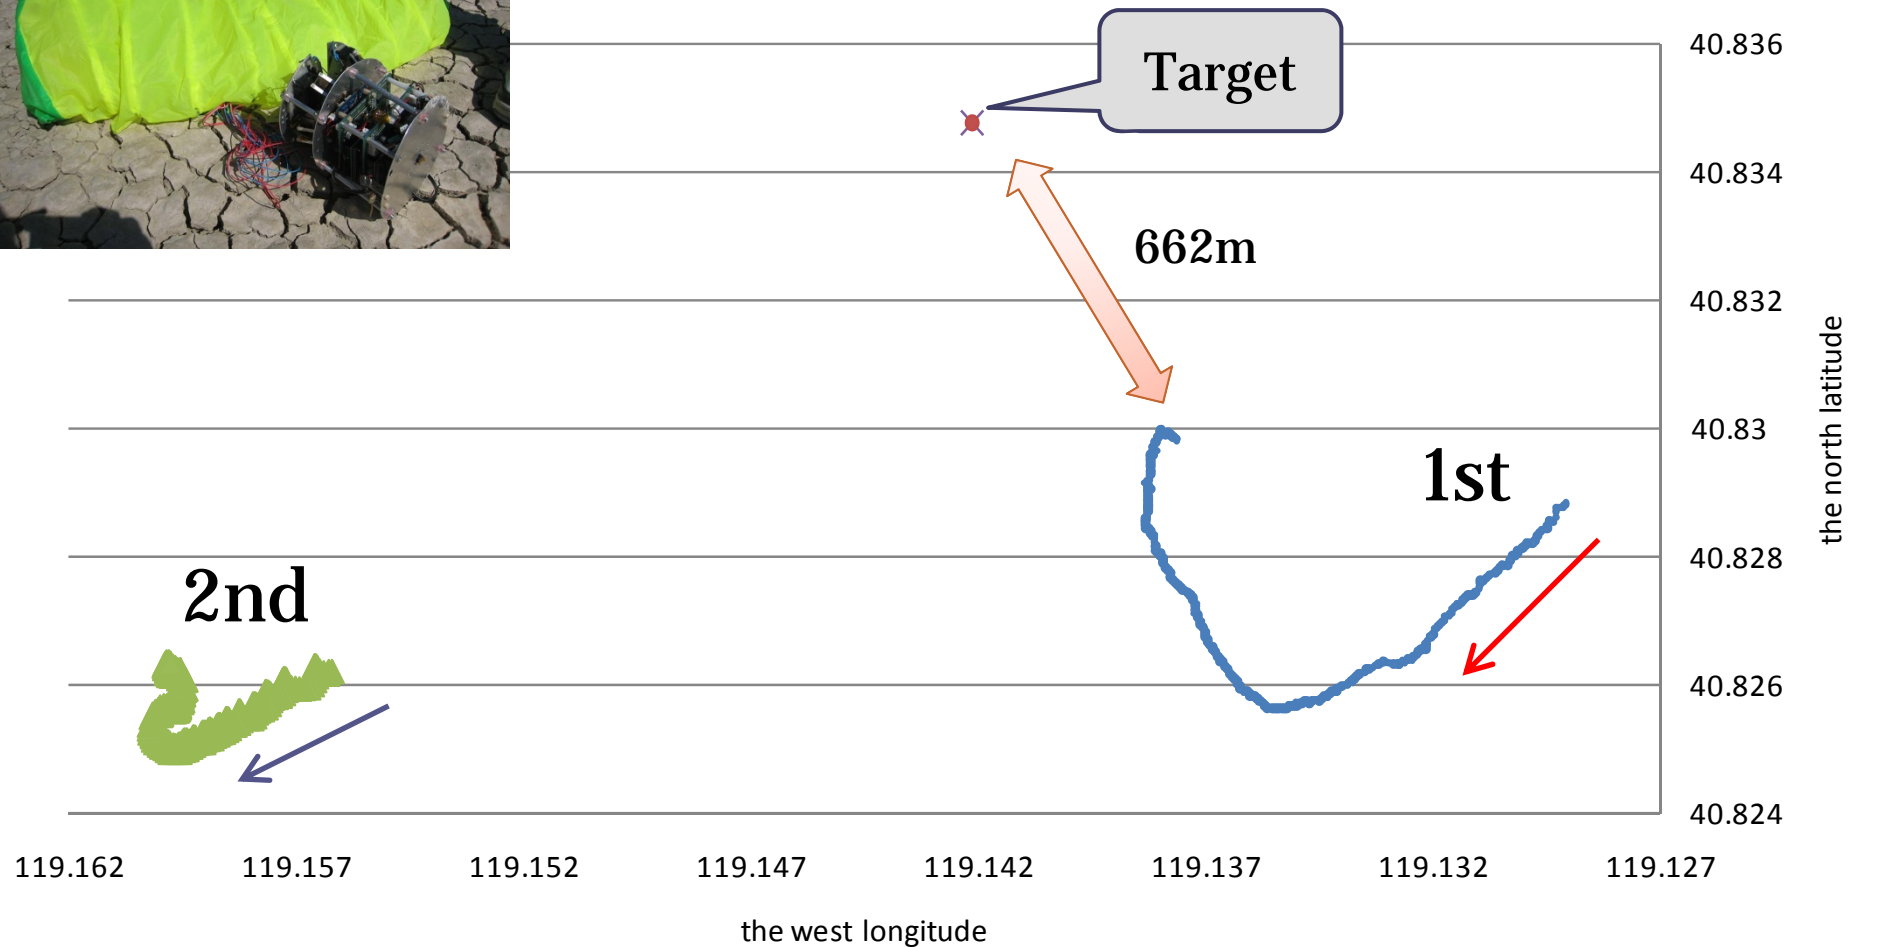

- It is 3 cycles to succeed in taking 6 pictures at same time , though some pictures included noise.
- Our cameras stopped on the way of flight.
- Our CanSat landed at 662m from the target.
- Pictures indicated that our CanSat flied steady.
